**HONG LEONG CAPITAL BERHAD ("HLCB" or "Company")**  
**(formerly known as HLG Capital Berhad)**  
*(Company Number 213006-U)*  
**NOTES TO INTERIM FINANCIAL STATEMENTS**  
**FOR THE FINANCIAL PERIOD ENDED 31 DECEMBER 2019**

**Explanatory Notes pursuant to the Malaysian Financial Reporting Standard 134 ("MFRS 134") and Guidelines on Financial Reporting issued by Bank Negara Malaysia ("BNM")**

**1. Basis of preparation**

The unaudited condensed financial statements for the financial period ended 31 December 2019 have been prepared under the historical cost convention, as modified by the revaluation of financial investments at fair value through other comprehensive income ("FVOCI") and financial assets/financial liabilities (including derivative financial instruments) at fair value through profit or loss ("FVTPL").

The unaudited condensed financial statements have been prepared in accordance with MFRS 134: Interim Financial Reporting issued by the Malaysian Accounting Standard Board ("MASB") and paragraph 9.22 of Bursa Malaysia Securities Berhad's Listing Requirements and should be read in conjunction with the audited annual financial statements for the Group and the Company for the financial year ended 30 June 2019. The explanatory notes attached to the unaudited condensed financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group and the Company since the financial year ended 30 June 2019.

The significant accounting policies and methods of computation applied in the unaudited condensed financial statements are consistent with those adopted in the annual audited financial statements for the financial year ended 30 June 2019 and modified for the adoption of the following Amendments to MFRSs applicable for financial year beginning on or after 1 July 2019:

- MFRS 16 'Leases'
- Amendments to MFRS 9 'Prepayment Features with Negative Compensation'
- IC Interpretation 23 'Uncertainty over Income Tax Treatments'
- Annual Improvements to MFRSs 2015 – 2017 Cycle
  - Amendments to MFRS 112 'Income Taxes'
  - Amendments to MFRS 123 'Borrowings Costs'

The adoption of these MFRSs, amendments to MFRSs and IC Interpretations did not have any significant financial impact on the results of the Group and the Company other than the effects and change in accounting policies arising from the adoption of MFRS 16 as disclosed in Note 36.

The preparation of unaudited condensed financial statements in conformity with the MFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited condensed financial statements, and the reported amounts of income and expenses during the reported period. It also requires Directors to exercise their judgement in the process of applying the Group and the Company's accounting policies. Although these estimates and assumptions are based on the Directors' best knowledge of current events and actions, actual results may differ from those estimates.

**2. Auditors' report on preceding annual financial statements**

**28. Fair value of financial instruments**

Determination of fair value and fair value hierarchy

The Group and the Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Valuations derived from valuation techniques in which one or more significant inputs are not based on observable market data.

Financial instruments are classified as Level 1 if their value is observable in an active market. Such instruments are valued by reference to unadjusted quoted prices for identical assets or liabilities in active market where the quoted prices is readily available, and the price represents actual and regularly occurring market transactions. An active market is one in which transactions occur with sufficient volume and frequency to provide pricing information on an on-going basis. These would include actively traded listed equities, unit trust investments and actively exchange-traded derivatives.

Where fair value is determined using unquoted market prices in less active markets or quoted prices for similar assets and liabilities, such instruments are generally classified as Level 2.

In cases where quoted prices are generally not available, the Group then determine fair value based upon valuation techniques that use as inputs, market parameters including but not limited to yield curves, volatilities and foreign exchange rates. The majority of valuation techniques employ only observable market data and so reliability of the fair value measurement is high.

Financial instruments are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data (unobservable inputs). This category includes unquoted shares held for socio economic reasons. Fair values for shares held for socio economic reasons are based on the net tangible assets of the affected companies. The Group's exposure to financial instruments classified as Level 3 comprised a small number of financial instruments which constitute an insignificant component of the Group's portfolio of financial instruments. Hence, changing one or more of the inputs to reasonable alternative assumptions would not change the value significantly for the financial assets in Level 3 of the fair value hierarchy.

### 36. Changes in accounting policies

MFRS 16 'Leases' (effective from 1 January 2019) supersedes MFRS 117 'Leases' and the related interpretations.

Under MFRS 16, a lease is a contract (or part of a contract) that conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

MFRS 16 eliminates the classification of leases by the lessee as either finance leases (on balance sheet) or operating leases (off balance sheet). MFRS 16 requires a lessee to recognise a "right-of-use" ("ROU") of the underlying asset and a lease liability reflecting future lease payments for most leases.

The ROU asset is depreciated in accordance with the principle as set out in MFRS 116 'Property, Plant and Equipment' and the lease liability is accreted over time with interest expense recognised in statements of income.

For lessors, MFRS 16 retains most of the requirements in MFRS 117. Lessors continue to classify all leases as either operating leases or finance leases and account for them differently.

The Group has adopted this standard from its mandatory adoption date of 1 July 2019. As permitted by MFRS 16, the Group has applied the modified retrospective approach and will not restate comparative amounts for the financial year prior to the first adoption. ROU assets for property leases will be measured on transition as if the new rules had always been applied. All other ROU assets will be measured at the amount of the lease liability on adoption (adjusted for any prepaid or accrued lease expenses).

On adoption of MFRS 16, the Group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of MFRS 117 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the Group's borrowing rate as of 1 July 2019. The weighted average incremental borrowing rate applied to the lease liabilities on 1 July 2019 for the Group was ranging from 4.11% and 4.94% per annum.

(a) The table below summarises the effects upon adoption of MFRS 16 as at 1 July 2019:

<b>The Group</b>	<b>As at 30 June 2019 RM'000</b>	<b>Effect of adoption of MFRS 16 RM'000</b>	<b>As restated 1 July 2019 RM'000</b>
ROU assets	-	27,358	27,358
Lease liabilities	-	26,831	26,831
Other liabilities	144,635	527	145,162

(b) Operating lease commitment reconciliation

The reconciliation on operating lease commitments under MFRS 117 to MFRS 16 are as follows:

	<b>The Group RM'000</b>
Operating lease commitments disclosed as at 30 June 2019	6,802
Less: Discounted using the incremental borrowing	(233)
Less: Short-term leases recognised on a straight-line basis as expense	(10)
Less: Low-value leases recognised on a straight line basis as expense	(72)
Add: Adjustments as a result of a different treatment of extension and termination option	20,344
Lease liabilities recognised as at 1 July 2019	<u>26,831</u>

The group recorded a 55.5% higher profit before tax ("PBT") of RM23.0 million for the 2nd quarter ended 31 December 2019 as compared to RM14.8 million recorded in the previous year corresponding quarter.

Higher PBT mainly contributed by higher non-interest income earned (35.6%).

The performance of the respective operating business segments for the 2nd quarter ended 31 December 2019 as compared to the previous year corresponding quarter is analysed as follows:-

	<b>The Group</b>		<b>Variance</b>	<b>%</b>

Investment banking and stockbroking - higher PBT by RM4.2 million (51.0%) attributed to higher profit contribution from both its investment banking division and stockbroking division in current quarter.

Fund management and unit trust management - PBT increased by RM2.1 million (35.1%) mainly due to higher net contribution from management fee income.

## 2. Prospects for 2019

Moving into FY2020, the economic outlook is anticipated to improve with the resumption of mega infrastructure projects. Along with this positive development, the regulators have also been playing an active role together with the market participants to revive the vibrancy of the capital markets from product innovation, accessibility, technological advancement and governance perspective. Premised on this improving landscape, Debt Markets contribution in FY2020 is expected to be higher than FY2019 with new funding opportunities to be explored and the completion of the outstanding mandates carried forward from FY2019.

Corporate Finance saw strong demands for its two completed Main Market IPOs in FY2019 as evidenced by overwhelming subscriptions by both the institutional and retail investors, and expects the trend to continue into FY2020. The team will continue to keep abreast of developments of the medium sized companies, while at the same time, maintaining a keen focus on providing value-added corporate advisory services to clients. Corporate exercises that provide opportunity for multiple revenue streams via placement and underwriting activities will also remain as one of the key focus going forward.

Under Stockbroking business, as for Government-Linked Corporation business, HLIB will continue to engage our customers to rebuild volume and HLIB also plan to introduce Direct Market Access trading, which allows clients to trade electronically through HLIB. As for the Retail Business, the Bank will continue to invest and innovate in digitalisation efforts to build and strengthen market position.

In view of the current market uncertainty from the trade tension which has a negative impact to the regional growth and a possible interest rate cut by US Federal Reserve and Bank Negara Malaysia to mitigate the slower growth effect, Hong Leong Asset Management Bhd ("HLAM") will focus on high dividend yield stocks that may re-rate in view of the benign interest rate environment. Domestic-centric sectors, for example, construction and consumer, are also preferred as these sectors are expected to be less susceptible to global macro uncertainties. Selected export stocks that may benefit from possible supply chain diversions may be considered. HLAM is committed to deliver fund performance through a robust investment process with investment strategies consistently executed by a competent and experienced investment team. The team employs bottom-up stock picking approach which is key to fund outperformance in the local stock market. Fundamental-based investment strategy is strictly observed to avoid occurrence of emotional investing that may lead to bad investment decisions. In the current environment of rapidly evolving political and economic landscape, increased effort will be deployed to obtain business updates and outlook from companies in order to make sound investment decisions.
